

Dear Parent/Guardian,

Your student is considered a close contact of a student who tested positive for Covid. The date of contact was _____. Our new guidance allows for three options: your student to stay in school on a modified quarantine provided they are symptom free and take a COVID test on campus 2x within an eight day window of their contact.

1) My student is vaccinated.

-If your student is vaccinated, symptom free and we have proof of vaccination they do not need to test but may not return to extracurricular activities for 8 days from date of contact.

2) My student is not vaccinated, but I will allow them to take a rapid test twice on campus and they can continue in classes on a modified quarantine.

- If your student is unvaccinated and you want them to continue on campus parents must sign and return the attached testing consent form which can also be found on our website and in our office.
- Parents also need to register their students online using the QR code below in order for students to test. *You only need to complete the consent form and register once.*
- Students will test Tuesdays and Thursdays in room 405 at 7:45 am.
- A modified quarantine means they can come to school, but cannot participate in sports/extracurricular activities until the eight-day period has passed.

3) My student is not vaccinated and I do not want them tested

- If you do not want your student tested they need to stay home and isolate for 10 days from the contact date.

*****If you are planning on your student staying in school and testing we need the attached form back ASAP- (you can sign and return this to the office or take a picture of it and email it to jdahl@summbears.net)**

*****If you do not want them tested please let us know ASAP and keep your child home for the 10-day quarantine period**
